

List of Outdoor Organisms

Snails

Earthworms

Ants

Slugs

Termites

Beetles

Millipedes/centipedes

Pill bugs will be the model organism used by the teacher throughout the unit; it will also be the focus of the guided science investigations. **Note: Children will not learn the name of the model organism until the guided science investigation on Day 3; until then, teacher should refer to pill bugs by the nickname “roly-poly” (or “roly-polies” in the plural).**
